Inspiration & innovation for future bathroom

## MATERIAL APPROVAL

|                    |                       |
|--------------------|-----------------------|
| <b>Description</b> | Automatic Wall Faucet |
| <b>Model</b>       | MF-115                |
| <b>Brand</b>       | MARVEL                |

## Product Specification

|                                    |                                                                                                      |
|------------------------------------|------------------------------------------------------------------------------------------------------|
| <b>Material</b>                    | Brass with chrome                                                                                    |
| <b>Operate Voltage</b>             | 6VDC with AAA battery 300,000 cycles / AC 220V with circuit breaker protection with IEC 898 standard |
| <b>Detection Zone</b>              | 20 - 30 cm. (Adjustable by remote control)                                                           |
| <b>Suitable Water Pressure</b>     | 0.5 - 6 Bar                                                                                          |
| <b>Flow Rate</b>                   | 0.5 gpm / 1.5 lpm                                                                                    |
| <b>Ambient Temperature</b>         | 1 - 55 °C                                                                                            |
| <b>Dia. Of Inlet / Outlet Pipe</b> | G1/2" (DN15)                                                                                         |
| <b>Warranty</b>                    | 3 Years                                                                                              |
| <b>Standard</b>                    | ISO9001:2015 / CE / UL                                                                               |
